You must provide an administrator with the ability to manage company information in Office 365. You need to assign permissions to the administrator by following the principle of least privilege. Which role should you assign? A. Global administrator B. Service administrator C. Billing administrator D. User management administrator Answer: A Explanation:

<https://support.office.com/en-US/Article/Assigning-admin-roles-eac4d046-1afd-4f1a-85fc-8219c79e1504> QUESTION 22 Hotspot Question You are the SharePoint Online administrator for Contoso, Ltd. The company purchases an Office 365 Enterprise E1 plan. The public-facing website must use SharePoint Online and the custom domain contoso.com. You need to configure the DNS settings for the public-facing SharePoint site. How should you configure the DNS settings? Select the appropriate options from each list in the answer area. Answer: QUESTION 23 Drag and Drop Question A company deploys an Office 365 tenant. All employees use Lync Online. You need to configure the network firewall to support Lync Online. Which ports must you open? To answer, drag the appropriate port number to the correct feature or features. Each port number may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: QUESTION 24 An organization plans to migrate to Office 365. You need to estimate the post-migration network traffic. Which tool should you use? A. Microsoft Online Services Diagnostics and Logging (MOSDAL) Support Kit B. Microsoft Network Monitor C. Lync 2013 Bandwidth Calculator D.

Microsoft Remote Connectivity Analyzer Answer: C Explanation: <http://technet.microsoft.com/en-us/library/hh852542.aspx> There are calculators available to assist you with estimating network bandwidth requirements. These calculators work for on-premises as well as Office 365 deployments. You can use the Exchange client network bandwidth calculator to estimate the bandwidth required for a specific set of Outlook, Outlook Web App, and mobile device users in your Office 365 deployment. With the Lync Server 2010 and 2013 bandwidth calculator, you enter information about users and the Lync Online features you want to deploy, and the calculator helps you determine bandwidth requirements. Exchange Client Network Bandwidth Calculator Lync 2010 and 2013 Bandwidth Calculator OneDrive for Business synchronization calculator QUESTION 25 Drag and Drop Question You are the Office 365 administrator for your company. You need to ensure that trusted applications can decrypt rights-protected content. Which four Windows PowerShell cmdlets should you run in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order. Answer: QUESTION 26 Drag and Drop Question You are the Office 365 administrator for Contoso, Ltd. User1 is unable to sign in. You need to change the password for User1 and ensure that the user is prompted to reset her password the next time she signs in. How should you complete the relevant Windows PowerShell command? To answer, drag the appropriate Windows PowerShell segments to the correct location or locations. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: Explanation: <https://msdn.microsoft.com/en-us/library/azure/dn194140.aspx> QUESTION 27 You are the Office 365 administrator for your company. A user named User1 from a partner organization is permitted to sign in and use the Office 365 services. User1 reports that the password expires in ten days. You must set the password to never expire. Changes must NOT impact any other accounts. You need to update the password policy for the user. Which Windows PowerShell cmdlet should you run? A. Set-MsolPasswordPolicy B. Set-MsolPartnerInformation C. Set-MsolUser D. Set-MsolUserPassword Answer: C Explanation: <http://onlinehelp.microsoft.com/en-ca/office365-enterprises/hh534387.aspx> QUESTION 28 Drag and Drop Question You are the Office 365 administrator for your company. Users report that their passwords expire too frequently, and they do not receive adequate notice of password expiration. Account passwords must remain active for the longest duration allowed. Users must receive password expiration notifications as early as possible. You need to configure the password expiration policy. How should you set the policy on the password page of the Office 365 admin center? To answer, drag the appropriate duration to the correct location. Each duration may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Answer: QUESTION 29 Drag and Drop Question A company has 50 employees that use Office 365. You need to disable password expiration for all accounts. How should you complete the relevant Windows PowerShell commands? To answer, drag the appropriate Windows PowerShell segment to the correct location in the answer area. Each Windows PowerShell segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: QUESTION 30 Drag and Drop Question A company deploys an Office 365 tenant. All employees in the human resources (HR) department must use multi-factor authentication. They must use only the Microsoft Outlook client to access their email messages.

User1 joins the HR department. You need to help User1 configure his account. Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer:

Explanation: <http://msdn.microsoft.com/en-us/library/azure/dn383636.aspx#enablemfaoffice365> QUESTION 31 Drag and Drop

Question You are the Office 365 administrator for your company. You audit the Windows Azure Active Directory Rights Management configuration for the company. You need to view a log of the recent administrative commands performed against the Microsoft Rights Management Service. Which three Windows PowerShell cmdlets should you run in sequence? To answer, move the appropriate cmdlets from the list of actions to the answer area and arrange them in the correct order. Answer: QUESTION 32 Your company has an Office 365 subscription. The network contains an Active Directory domain. You configure single sign-on for all users. You need to verify that single sign-on functions for the users who access Office 365 from the Internet. What should you run?

A. the Get-MSOLFederationProperty cmdlet B. the Test-OrganizationRelationship cmdlet C. the Microsoft Remote Connectivity Analyzer D. the Microsoft Exchange Server Deployment Assistant Answer: C QUESTION 33 You are the administrator for a company named Contoso, Ltd. The company has an Office 365 subscription. Your need to prevent users from changing their user display name by using Outlook Web App. What should you do? A. Run the

Set-MsolCompanyContactInformation cmdlet. B. Modify the default email address policy. C. Run the Set-MsolUserPrincipalName cmdlet. D. Modify the default role assignment policy. Answer: D Explanation:

<http://help.outlook.com/en-us/140/ff852817.aspx> QUESTION 34 You are the Office 365 administrator for your company. The company uses Active Directory Federation Services (AD FS) to provide single sign-on to cloud-based services. You enable multi-factor authentication. Users must NOT be required to use multi-factor authentication when they sign in from the company's main office location. However, users must be required to verify their identity with a password and token when they access resources from remote locations. You need to configure the environment. What should you do? A. Disable AD FS multi-factor authentication. B. Configure an IP blacklist for the main office location. C. Disable the AD FS proxy. D. Configure an IP whitelist for the main office location. Answer: D Explanation: <https://msdn.microsoft.com/en-us/library/azure/dn807156.aspx> The Trusted IPs allows users

to bypass Azure Multi-Factor Authentication for website requests originating from specific IP addresses or subnets. For example, you may want to exempt users from Azure Multi-Factor Authentication while logging in from the office. For this, you would specify the office subnet as an Trusted IPs entry. To configure Trusted IPs use the following procedure: bla bla bla :)) QUESTION 35 Hotspot Question An organization has over 10,000 users and uses a SQL-based Active Directory Federation Services (AD FS) server farm. You need to change the AD FS 2.0 service account password. What should you do? Select the correct answer from each list in the answer area. Answer: QUESTION 36 Drag and Drop Question A company deploys an Office 365 tenant. You install the Active Directory Federation Services (AD FS) server role on a server that runs Windows Server 2012. You install and configure the Federation Service Proxy role service. Users sign in by using the Security Assertion Markup Language (SAML) protocol. You need to customize the sign-in pages for Office 365. Which pages should you customize? To answer, drag the appropriate page to the correct customization. Each page may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: QUESTION 37 Contoso uses Office 365 for collaboration services. You implement single sign-on (SSO) with Office 365 by using Active Directory Federation Services (AD FS). You need to implement Windows Azure multi-factor authentication. Which three actions should you perform? Each correct answer presents part of the solution. A. On the AD FS federation server, run PhoneFactorAgentSetup.exe. B. On the AD FS Federation server, run WindowsAzureSDK-x64.exe. C. On the AD FS Federation server, run the Windows PowerShell cmdlet Register-AdfsAuthenticationProvider. D. On the AD FS Federation server, run FsConfigWizard.exe. E. Run the Active Directory Domains and Trusts MMC snap-in. Register Windows Azure Multi-Factor Authentication Server as an additional authentication provider. F. Run the Windows Azure Multi-Factor Authentication Server Authentication Configuration Wizard. Answer: BCF Explanation:

<http://blogs.technet.com/b/cbernier/archive/2013/12/02/multi-factor-authentication-the-simple-way.aspx> QUESTION 38 A company plans to deploy an Office 365 tenant. You have two servers named FS1 and FS2 that have the Federation Service Proxy role service installed. You must deploy Active Directory Federation Services (AD FS) on Windows Server 2012. You need to configure name resolution for FS1 and FS2. What should you do? A. On FS1 and FS2, add the cluster DNS name and IP address of the federation server farm to the hosts file. B. On FS1 only, add the cluster DNS name and IP address of the federation server farm to the hosts file. C. On FS1 only, add the cluster NetBIOS name and IP address of the federation server farm to the LMHOSTS file. D. On FS1 and FS2, add the cluster NetBIOS name and IP address of the federation server farm to the LMHOSTS file. Answer: A Explanation: <http://office365support.ca/setting-up-adfs-proxy-server-part-1/> QUESTION 39 Drag and Drop Question You are the Office 365 administrator for your company. You must configure a trust between the on-premises Active Directory domain and the Office 365 environment by using Active Directory Federation Services. You need to assign the correct certificate to the description

of your on-premises server environment below. Which certificate types should you assign? To answer, drag the appropriate certificate type to the correct test description. Each certificate type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. Answer: QUESTION 40A company named Fabrikam, Inc. is deploying an Office 365 tenant. You install Active Directory Federation Services (AD FS) on a server that runs Windows Server 2012. The company's environment is described in the following table: You must obtain a certificate from a certification authority and install it on the federation servers. You need to specify the subject name for the certificate. Which name should you specify? A. fs.fabrikam.com B. server1.fabrikam.com C. fabrikam.com D. server2.fabrikam.com Answer: A Explanation: <http://blogs.technet.com/b/askds/archive/2012/01/05/understanding-the-ad-fs-2-0-proxy.aspx> Lead2pass helps millions of candidates pass the Microsoft 70-346 exam and get the certification.
